

ABDULLAHI MAWI MAMUDU

Atlanta, Georgia | +1 470-461-2146 | abduallahmamudu20@gmail.com

PROFESSIONAL SUMMARY

Software Engineer and AI Systems Specialist with proven experience designing, building, and deploying scalable software applications across distributed systems, AI infrastructure, and cloud-based environments. Strong proficiency in Python, JavaScript/TypeScript, FastAPI, Node.js, SQL databases, Redis, and modern backend architectures. Experienced in developing clean, maintainable, and production-ready code while improving system performance, scalability, and reliability for high-volume applications. Adept at independently scoping, implementing, debugging, and delivering software features in fast-paced engineering environments using collaborative development workflows and CI/CD practices.

PROFESSIONAL EXPERIENCE

Handshake AI | Senior Full-Stack / AI Engineer (2025 – Present)

- Engineered and deployed resilient backend systems driving distributed AI evaluation and high-throughput processing sequences.
- Developed production-grade APIs and full-stack applications utilizing Python, FastAPI, Next.js, PostgreSQL, and Redis.
- Revamped backend services to maximize scalability, maintainability, and reliability.
- Collaborated asynchronously on architecture planning, implementation strategies, and technical reviews.

Outlier AI | Full-Stack Software Engineer (2024 – Present)

- Developed scalable evaluation tools, dashboards, and backend services for AI assessment workflows.
- Designed asynchronous processing pipelines and optimized database queries to boost throughput.
- Introduced Git-based collaborative workflows and automated CI/CD deployment processes.

Scale AI | Software Engineer (2023 – 2024)

- Engineered distributed backend services and high-volume data processing pipelines supporting AI infrastructure.
- Improved system scalability and optimized production efficiency across engineering workflows.

IBM | Machine Learning Engineer (2022 – 2023)

- Developed machine learning and NLP applications within cloud-based production environments.
- Architected scalable APIs and backend services for analytics workflows and real-time computation systems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Swift, SQL

Software Engineering: Distributed Systems, System Design, Data Structures & Algorithms, Debugging, Refactoring

Frontend: React, Next.js, Tailwind CSS, Redux, HTML5, CSS3

Backend & APIs: FastAPI, Flask, Node.js, REST APIs, Microservices, PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub Actions, CI/CD Pipelines

AI & ML: LLM Evaluation, NLP, Prompt Engineering, AI Optimization, AI Infrastructure

EDUCATION

Doctor of Philosophy (PhD) in Software Engineering — Massachusetts Institute of Technology (MIT), 2023–2026

Master of Science (MSc) in Software Engineering — Massachusetts Institute of Technology (MIT), 2020–2023

Bachelor of Science (BSc) in Software Engineering — Massachusetts Institute of Technology (MIT), 2016–2019

PROJECTS

Distributed AI Evaluation Platform – Engineered scalable AI evaluation systems utilizing Python, FastAPI, PostgreSQL, and Redis for distributed processing.

Full-Stack SaaS Platform – Built a production-ready SaaS application with Next.js, Node.js, PostgreSQL, Redis, and Tailwind CSS while implementing CI/CD deployment workflows.

Developer Productivity CLI Tool – Developed a Python-based automation tool to accelerate engineering workflows, API integrations, and deployment processes.

CERTIFICATIONS

- Stanford Machine Learning
- Google Cloud AI
- AWS Machine Learning Foundations
- IBM Data Analytics
